NOBU USA'S INWALL TOUCH PANEL PC AND WIFI TABLET PC WILL BE FEATURED IN THE 2005 NEXTGEN HOMES

Dedicated to developing the next generation of home automation products, NOBU will showcase there inwall touch panel PC and tablet PC.

Costa Mesa, Calif., May 3, 2005– NOBU USA, a leading provider of home automation products, has teamed up with IShow to showcase Nobu's high-end next generation N12WTS and N12TBPC in the 2005 NextGen Homes. Nobu's N12WTS inwall touch panel pc will be located in the wall at the entrance of the home theater room controlling the home theater system, using CasaWork's award winning software. The demonstration will show the simplicity and convenience of integrating a home theater system with Nobu touch panels as the central control point.

"This is truly the best way to demonstrate and showcase high-end home automation," said Ben Yang, Nobu's vice president of business development. "Combining Nobu's control panels and CasaWorks software delivers an affordable home automation system without compromising functionality and sophistication. "

"The 2005 NextGen Home will provide the consumer a glimpse of home controls," said Leonard Pascual, Vice President of Business Development at CasaWorks.

"CasaWorks, providing software control capability, and Nobu, providing the touch panels for a user interface, will demonstrate the simplicity of controlling the home theater and other devices in the 2005 NextGen Home. "

About Nobu

Launched in February 2001, Nobu is a privately held company comprised of highly-qualified people with an intense focus to be the best in open-source home automation. The company is dedicated to the development of digital living products, the applications of open-source home automation, and simple and practical residential framework systems. By providing quality customer service, innovative technology, and competitive pricing - NOBU has positioned itself to be a leader in the home automation industry.
